

# ALL'S WELL THAT ENDS WELL

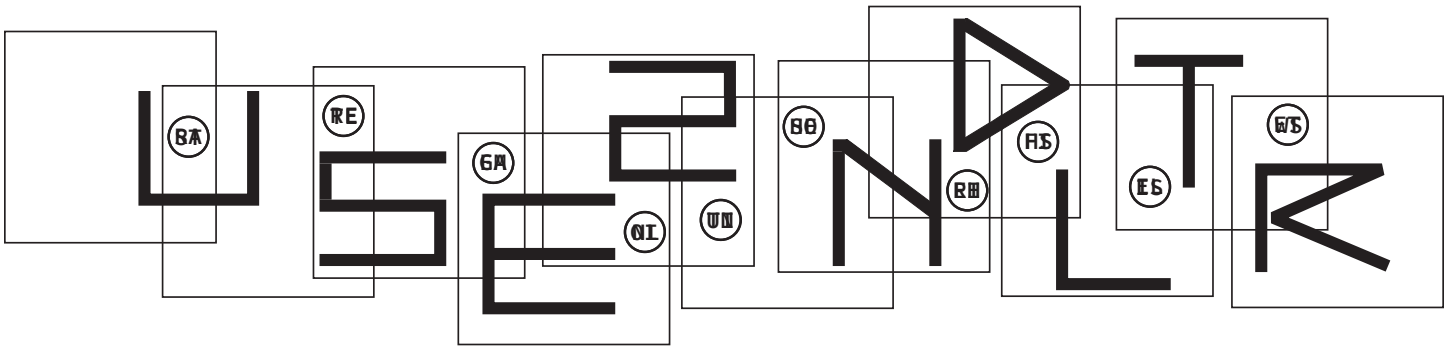

## SOLUTION

### PUZZLE 5

At the bottom of the well, you discover eleven pieces of glass. There are many stories about where Grandpa Sutton got the treasure, and though the details have clearly gotten **mixed up** through the years, you are confident that your team of deputies will be able **piece together** the information on how the treasure was originally obtained.

*The transparency (page 2 of this puzzle) shows the eleven pieces of glass; cut them out.*

When assembled correctly, the pieces form the phrase **USE 2ND LTR (USE SECOND LETTER).**

Each stack of two circles contains a total of four letters; they can be "mixed up" to form 4-letter words, each of which is a category. The blue coin with 10 words clues each category by providing an example of an item in that group.

STAR  
TREE  
GAME  
LION  
UNIT  
SHOE  
HEIR  
FISH  
ISLE  
STEW

Read the second letter of each 4-letter category to get the answer:

**TRAIN HEIST**
