

5. DEEP SPACE NETWORK SOLUTION

Each two- or three-word silly phrase is cluing a compound word or common phrase. E.g. combustion labor = fireworks (some use homophones, e.g. atmosphere grassland = air plain, which clues airplane).

The letters of the two (or three) answer words are interleaved to form one of the letter groups on the left, e.g. waste + land becomes lawasnted. Draw the bitmap pattern that is next to those letters in the grid, in the position corresponding to the clue.

On the last page, each quadrant specifies a color and one of the 9 positions; draw the corresponding bitmap (from the first 4 pages) in the blank grids at the bottom. Each group of 4 will form a letter. The final result is: WITNESS THIS PRIMAL FORCE

 atmosphere grassland	 spin pond	 above master
 combustion labor	 precipitation ribbon	 squander unsea
 darkness monotony	 stream cot	 turf jumper

-  lawasnted
-  blbaocarkd
-  wofirrkes
-  ghorpaspers
-  palianre
-  ribveedr
-  braoiwn
-  olorverd
-  wpohoilrl
