

# HEART

## SOLUTION

Page 1 of 1

### Puzzle 2

Oh no! There seems to be a problem with the circulation *around* the heart. Cut out the 16 squares on page 2 and use them to determine how you can enrich it with more *oxygen*!

Assemble the squares around the heart, forming words for colors ranging from cardinal to cobalt (changing red to blue as the blood loses oxygen).

Read the outer letters around the heart, adding O (oxygen) as necessary. The result is: You're looking for the two words **BLOOD DONATION**
